JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Report from Santiago—Inspection of vessels.

Acting Assistant Surgeon Wilson reports, January 15:

Week ended January 11.

Bills of health issued to 5 vessels bound for the United States. No vessel was fumigated. No quarantinable disease was reported.

GREAT BRITAIN.

Second case of plague at Glasgow.

An official report of the foreign office from London transmitted December 19 by the Belgian legation to the Government of Belgium and published in the Bulletin Sanitaire, an official publication of the Belgian Service of Health and Hygiene, December 25, states that a second case of plague occurred at Glasgow, which passed unrecognized on account of the diagnosis having to be made very slowly. The patient fell ill August 17 and was admitted to hospital August 23. It was not possible to base a diagnosis on the clinical symptoms. The patient died August 31. The results of necropsy, bacteriological examination of tissues, and inoculations of mice justify the declaration of a case of plague. This case antedates the plague case at Glasgow reported in the Public Health Report, November 29, 1907, page 1739.

HAWAII.

Reports from Honolulu—Outgoing quarantine transactions.

Chief Quarantine Officer Ramus reports, January 5:

Week ended January 11.

Vessels inspected and bills of health issued.....	4
Cabin passengers inspected.....	25
Members of crews inspected.....	80

Examination of rats for plague infection.

Passed Assistant Surgeon Currie reports that during the week ended January 4, 172 rats were examined bacteriologically at the plague laboratory of the Service at Honolulu. No plague infection found.
